Dermatology course for healthcare professionals

8th Annual Anogenital and Oral Dermatology Course

24 – 25 May 2018
London, UK

This two-day annual course provides participants with an overview of anogenital and oral dermatology, including diagnosis, treatment options, dealing with complications and co morbidities, and the latest research in the field. Throughout the programme clinical based studies will be used to highlight current treatments and to combine theory and clinical practice.

The course is aimed at all healthcare professionals (dermatology, gynaecology, GU medicine, oral medicine, GPs, and specialist nurses) who wish to learn more about the diagnosis and management of male and female anogenital and oral dermatological disorders. It will address the importance of multidisciplinary working in the care of these patients.
