Workshops For Healthcare Professionals

Laparoscopic Urogynaecology Advanced Masterclass

16th November 2018

Native Tissue Continence Surgery Masterclass

17th November 2018

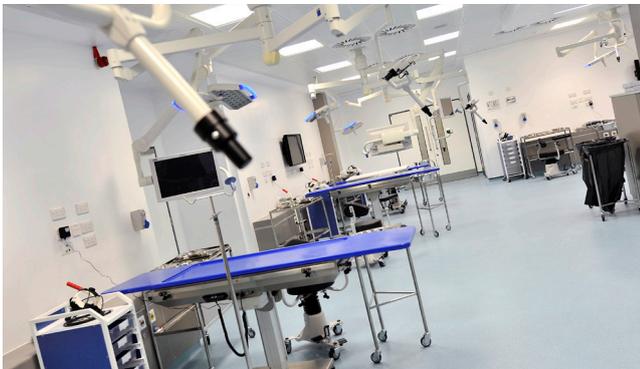

University of Manchester

Preparation before the course

- Review relevant anatomy, surgical landmarks and danger zones

Lab tips and what to expect on the day

- Dress in layers as the lab is usually cool. Wear comfortable shoes (covers will be provided)
- Eat and drink well if you are not used to being in a lab. We will be working on fresh frozen specimens (as they are superior to embalmed from a learning perspective) so there is very little to no smell
- Before we start our work we will have a silent moment to express gratitude to donors. If you have questions about the donation process in the UK, see www.hta.gov.uk for more information
- The lab will be set up similar to an operating theatre, and specimens will be draped and covered much like a normal theatre. There may be prosections on display

Native Tissue Continence Surgery Masterclass

The course offers (re)learning and consolidation of surgical skills in native tissue (non mesh) incontinence procedures.

Increasing numbers of Urogynaecologists and Urologists are keen to (re)introduce native-tissue continence surgery to their practice.

Building the necessary skills in gold standard alternatives to the use of mesh will inevitably lead to desired shared decision making.

Laparoscopic Urogynaecology Advanced Masterclass

Over the last 5 years there has been increased awareness of the role of Laparoscopy in surgical treatment of incontinence and prolapse procedures.

Building on the two highly successful RCOG meetings and the new Advanced Training Skills Module (ATSM), our five-year-old, hands-on advanced masterclass on fresh frozen cadavers is increasingly popular among Urogynaecologists and Urologists alike.

Laparoscopic Urogynaecology Advanced Masterclass - 16th November 2018

08:30	Registration & Introduction	
09:00	Laparoscopic Colposuspension Extraperitoneal Technique - Tips and Tricks <ul style="list-style-type: none"> • Space of Retzius entry through incision above the symphysis pubis • Cannulae insertion at the suprapubic area to access extraperitoneum • Paravaginal fascia and Cooper's ligaments identification • Suturing techniques • How to pull the Paravaginal fascia toward Cooper's ligaments to produce a zero-degree Q-Tip angle in the urethra 	Faculty
09:20	Laparoscopic Colposuspension Intraperitoneal Technique - Tips and Tricks	Faculty
09:40	Laparoscopic Colposuspension Cadaver Lab	All
12:00	Lunch	
13:00	Laparoscopic Sacrocolpo(hystero)pexy - Techniques, Tips and Tricks	Faculty
13:30	Laparoscopic Sacrohysteropexy Cadaver Lab	All
15:00	Break	
15:30	Laparoscopic Sacrocolpopexy Cadaver Lab	All
16:30	Feedback & Close	

One Day - Laparoscopic Urogynaecology Advanced Masterclass - from £700 (+VAT)

Includes: pre-course materials, refreshments, lunch, all associated fees with cadaver lab training and preparation, cleaning, materials and products used during the day, course fee, logistics, trainers' fees, insurance and 7 CPD points.

FACULTY - TBD

Native Tissue Continence Surgery Masterclass - 17th November 2018

08:30	Registration & Introduction	
09:00	Introduction - Why Native Tissue Surgery?	Faculty
09:15	Open Colposuspension - Standard Technique (Burch) Variations (Tanagho & Obturator Shelf) - Tips & Tricks	Faculty
09:45	Open Colposuspension Procedure - Cadaver Lab	All
11:00	Break	
11:30	Open Colposuspension Procedure - Cadaver Lab	All
13:00	Lunch	
14:00	Autologous sling - Standard Technique Variations (Aldridge's & Sling-on-a-String), Tips and Tricks	Faculty
14:30	Autologous Sling Procedure - Cadaver Lab	All
15:30	Break	
16:00	Bulking Agent Procedure - Cadaver Lab	All
17:30	Feedback & Close	

One Day – Native Continence Surgery Masterclass - from £700 (+VAT)

Includes: pre-course materials, refreshments, lunch, all associated fees with cadaver lab training and preparation, cleaning, materials and products used during the day, course fee, logistics, trainers' fees, insurance and 7 CPD points.

FACULTY - TBD

London Medical Education Academy (LMEDAC) provides advanced surgical education to the medical profession and other healthcare professionals across the world. The Academy provides the best possible environment for surgeons to learn and perfect their techniques on cadaveric material.

With the latest technology and actively practising, skilled and experienced surgeons as Faculty, the London Medical Education Academy provides the highest standard of training and continued professional development.

Venue

The courses will be held in a modern, state of the art lab based in:

Manchester University

Testimonials

“Fantastic course run by entertaining and skilful team.”
 “Excellent hands on cadaver training opportunity – and sharing experiences”
 “Presentations were to the point and concise, the videos are a brilliant idea to aid hands on”
 “Valuable expert discussion and tips”
